Sror Hassan - Backend Developer (.NET)

Al-Hasakah – Syria | +963 935 154 715 | sroorhassan.dev@gmail.com | linkedin.com/in/sroorhassan | github.com/sroorhassan

Profile Summary

.NET Backend Developer experienced in building reliable and maintainable applications using ASP.NET Core, C#, and SQL Server. Skilled in developing structured solutions using a 3-layer architecture, implementing RESTful APIs, and working with relational databases. Seeking to grow in a backend-focused environment and contribute to real-world production systems.

Projects

Online Football Stadiums Booking Platform | React.js, ASP.NET Core, C#, SQL Server

Developed a comprehensive web application for booking and managing football stadium time slots online.

- Enabled players to request bookings for available time slots (one-time or recurring).
- Allowed stadium owners to review, approve, or reject booking requests.
- Implemented user authentication and authorization for secure access.
- Built an intuitive dashboard for both stadium owners and players to manage their activities efficiently.

Dental Clinic Management System | C#, .NET, SQL Server

Developed a comprehensive desktop application for managing patient appointments and treatments in a dental clinic.

- Added functionality to register and manage patient information.
- Implemented appointment scheduling with easy tracking and management.
- Recorded detailed treatment information (e.g., cleaning, fillings, procedures).

Football Stadium Management System | C#, .NET, SQL Server

Developed a desktop application for managing bookings of a football stadium.

- Created and managed reservations, including support for recurring bookings.
- Added functionality to register teams and maintain team information.
- Organized leagues with team assignments and scheduling features.
- Focused on delivering efficient and user-friendly stadium booking management.

Technical Skills

- **Programming Languages:** C++, C#, JavaScript, TypeScript, HTML, CSS

- **Frameworks & Libraries:** React, .NET, Bootstrap

- **Preprocessors & Tools:** Windows Services, Git

- **Databases:** SQL Server

- **Concepts & Others:** Object-Oriented Programming (OOP), Problem Solving, Algorithms, Data Structures, RESTful APIs

Languages

Kurdish (Native) - Arabic (Fluent) - German (B1) - English (B1)
